

PRESS RELEASE

May, 2018

LIVING & DESIGN Organizing Committee

LIVING & DESIGN 2018

Outline

1. Title

LIVING & DESIGN 2018

2. Intent

The international trade fair “LIVING & DESIGN” for living spaces and interiors was begun in 2009, with a theme of “renovating the home and lifestyles”, and this is the tenth year. Lifestyles with a keen sense, as well as spaces and their components have been proposed in this trade fair, where visitors can experience it via the five senses. Furthermore, we have been pursuing business expansion of the living environment industry. Our efforts have raised people’s interest in lifestyles and environments, promoted businesses, and reclaimed the next economic possibilities of Japan, where the living environment has significantly fallen behind. Currently, the international trade fair has been given high marks by many people for revitalizing industries and increasing domestic demand. While cooperating with various related organizations, “LIVING & DESIGN” transmits the latest information about living spaces and aids in designing lifestyles. We have established a unique style to incubate new ideas and creations through encounters, based on our core strength of bringing successful business arrangements that take advantage of the connections between exhibitors and visitors, or among exhibitors. At the same time, while paying attention to environmental issues and nature, we integrate Japan’s unique traditional lifestyles, traditions, technologies, and materials into the modern world by utilizing new ideas and methodologies of creators. We propose future lifestyles, solicit truly rich lifestyles for people, and realize the steady expansion of the renovation, interior, and living space industries. In this tenth year of “LIVING & DESIGN”, we are at another starting point and moving on to a new stage.

3. Theme of LIVING & DESIGN 2018

“NEXT FRONTIER”: 新たな時代へ

We are in the midst of a period of reform before a forthcoming major change, as technological innovations accelerate the rate of change of everything. We are moving toward a new era, where the impossible will become possible and an unimaginable life

PRESS RELEASE

will await us. Flexible integration of different areas and changes to enhance added value will likely be necessary. Based on our previous achievements, the tenth “LIVING & DESIGN” proposes future “houses and lifestyles” focusing on new possibilities, in order for the existing to become a foundation for innovations.
